

## To all of our Evolv Partners,

We are all grappling with the global scale of the current coronavirus situation and our prayers go out to those who have been affected. Each passing day brings new developments and we wanted to reassure you that we are monitoring the Centers for Disease Control (CDC) and World Health Organization's statements and following guidelines from these agencies as well as local health and state departments.

The wellbeing of our employees, Partners, Affiliates and Customers is of paramount importance. Although much of our staff works remotely, we have followed the CDC recommendations for extra cleaning procedures in our offices to ensure the ongoing safety of our Evolv Family. We have also provided all staff with Evolv products needed to maintain healthy immune systems.

We strongly suggest you continue to take Evolv supplements, especially Immūn, to reinforce the health of your immune system and those of your family members. As we have heard from numerous health officials a strong immune system is the best defense against this virus. As always, our goal is to make certain we maintain adequate inventory on all our products, and in particular Immūn, through this important time.

In an effort to responsibly respond to the CDC Social Distancing guidelines, our Global Impact event, scheduled for April in Dallas, has been postponed. Given the fluidness of the situation, we will continue to monitor the environment daily and react accordingly. At the same time, we are working with the DFW Marriott to confirm a later date in the coming months and will communicate those plans as soon as we can.

For those who have purchased tickets, we will send an Entourage<sup>2</sup>™ product and a packet of updated materials in the coming weeks to help offset this inconvenience and apply your ticket purchase to the future Global Impact date yet to be determined.

Stay tuned for an online event coming April 18th with exciting updates for this year.

As always, please follow the CDC Guidelines as global efforts continue to contain this virus.

With HOPE and blessings,
